

LIVWELL

Signature thermal destinations for luxury hospitality
and private residences.

ABOUT US

LivWell Studio designs and builds outdoor thermal sanctuaries for the world's finest hotels, lodges and Private residences. Rooted in authentic Nordic ritual and shaped by Africa's landscapes, each sanctuary brings fire, water and nature into one considered journey — turning wellness from an amenity into the signature of the property.

WHAT WE CREATE

THERMAL WELLNESS ENVIRONMENTS

Authentic Finnish saunas and cold plunges to natural pools, hot tubs and fire feature.

SOCIAL WELLNESS SPACES

The spaces around the heat — a fire to gather at, a shaded lounge, a quiet deck. Room to talk, to rest, or to sit in silence, and to stay a while.

COMPLETE WELLNESS ARCHITECTURE

A whole wellness landscape, composed as one — sauna, water, fire and light, drawn from the land and built to last for generations.

OUR PROCESS

Three steps from site visit to handover.

CONSULTATION & DESIGN

Every project begins with the property, its site, its owners and the objectives behind the space.

FABRICATION

Approved designs move into production at our Johannesburg workshop. Skilled craftsmanship meets controlled prefabrication; wherever possible, components are fully assembled and tested before they leave the floor — less complexity, less disruption on site.

DELIVERY & INSTALLATION

Before delivery, we coordinate access, foundations and services so the site is ready. Our specialist team transports, positions and installs; commissioning and final checks follow. The property receives a finished environment, ready to operate.

Steenberg Hotel & Spa

Date	2025
Location	Steenberg Western Cape
Sauna	Ark 5
